

ROYAL MARBLE

Technical Data Sheet

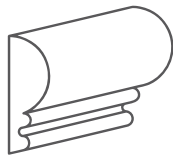

Royal Marble is a white stone with hints of grey and tan veining to create a highly unique but adaptable option. The reserved variation, clean appearance, and competitive pricing make Royal an ideal choice for residential and commercial uses.

SOURCE: North America

Applications

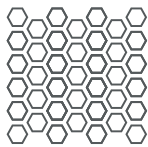

Arch. Elements

Moldings

Tile

Mosaics

Considerations

Freeze Thaw
(Pending Testing)

ASTM 97 Density	ASTM 97 Absorption	ASTM C170 Compressive Strength	ASTM C880 Flexural Strength	ASTM 353 Abrasion Resistance
170 lbs/ft ³	.06%	16,338.45 lbs/in ²	--	--

Care and Maintenance:

- High acid sensitivity is a property of marble. Care must be taken in the presence of acidic foods and cleaning products.
- Low abrasion resistance is inherent in most marbles. Light scratching will occur with exposure to abrasives. A patina will result over time. It is recommended to use mats at entrances in flooring applications.
- This Marble has a low to moderate absorption rate. It is recommended to seal this material prior to use. Sealers allow for additional time to "clean up" the spill, before it has time to result in a stain
